

Exhibit 2 Summary

The following antennas will be deployed in the proposed system:

Base Station: MTI MT-404007 60* Beamwidth: The base station will utilize a sectorized antenna. The azimuth will vary with the deployment of each remote sector as part of the tests.

Remote/CPE: MTI MT-30093: 8* Beamwidth:

Antennas will be mounted on existing towers and structures.

Radiation pattern information provided by the manufacturer is enclosed as attachments **Exhibit 2-A** and **Exhibit 2-B**.
