

EXHIBIT NO. 1

(Reference: Question Number 7)

The system that would be operated under this requested license will collect wind and virtual temperature profiles in Lemoore, California. The data collected will be used to support the California Regional PM10/PM2.5 Air Quality Study (CRPAQS) being conducted by the California Air Resources Board (CARB) in conjunction with NOAA during the period of November 1999 through November 2001 in the Central Valley of California.
