

Re: STA

I must inform the Office of Engineering and Technology (Experimental Licensing Request/Special Temporary Authority) of the FCC, that I am unable to reasonably complete additional data/requested information needed on my pending application and exhibits for Special Temporary Authority. I hereby withdraw my application for STA and request cancellation of my request/application for STA. My reasons for termination of this request is due to highly restrictive federal regulations limiting my requested frequency of operation and requested RF energy output power of the device I was wishing to build and test for the advancement of radio-electronic technology and protection of my local community.
