Message:

File# 0188-EX-CN-2017

March 20, 2017

In Reference to FCC Correspondence #36130

I have made typographical errors in the 442 Application as sent. I apologize for these errors.
The form should be changed to the following:

Antenna height above ground should be 21 Meters (69ft)
Elevation of ground at antenna site is 241 Meters (790' ASL
Antenna is mounted 8 Meters (26') below existing tower structure

The existing tower structure, (29 Meters in height) is lower than 200ft. and would not pose any danger to aircraft. The tower has been in existence for greater than 30 years.

Thank you
Joe Stroud
