Subject: Request for Info - File #0010-EX-PL-2007

Message:

Your experiment description says that you are "a system integrator based in Emporia Kansas that works with rural telephone companies, school districts and local government agencies providing wireless broadband equipment." Your response to my last request for info says, "The equipment used in the 3500-3650 MHz band will be used to better understand operations and transmission characteristics of the equipment for use in foreign markets." These two statements seem to conflict. Please explain. NTIA will absolutely not approve use of this band unless they are positively convinced that you are testing equipment for foreign markets.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of July 09, 2007 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
