Subject: Request for Info - File #0010-EX-PL-2007

---

Message:

I would like to request a change to our application to reflect 2500 - 2590 MHz utilizing a 16 km radius operation from the listed transmitter site.

If possible we would like to keep the 3500 - 3700 MHz portion of the application at 32 km radius of operation.

Performing a geo-search using the ULS tool, there appears to be no affected licensees within 16 km of the proposed transmitter site in the 2500 - 2590 MHz frequencies.

Please let me know if there is further action needed on my part.

Thanks for your help.
