Subject: ITU Cost Recovery Fees for the Swarm Satellite Network
Reference: FCC File Number: 0976-EX-ST-2018

Dear FCC Secretary,

Swarm Technologies Inc. (Swarm) hereby states that it acknowledges that the submission by the Commission of a new Advance Publication Information (API) notice to the International Telecommunications Union (ITU) as a result of Swarm's proposed non-geostationary (NGSO) satellite system, FCC File No. 0976-EX-ST-2018 will have ITU "cost-recovery" implications and will also require the listing of Swarm as a new Recognized Operating Agency at the ITU.

Swarm provided API-related documentation for its proposed experimental satellite network to the Commission via electronic submission to the OET experimental licensing portal and anticipates that these materials will be forwarded shortly to the ITU. Swarm understands the ITU will impose cost-recovery processing fees for the ITU filing and acknowledges its responsibility to reimburse the Commission for any and all cost-recovery fees associated with this ITU filing, as well as future filings that may be necessary in connection with the proposed application.

The undersigned is the point of contact for ITU cost-recovery billing matters and ITU correspondences and the contact information is below.

Sara Spangelo
