

Inc.

17 January 2002

FCC
Experimental Radio Station
Construction Permit and License

Explanation:

RE: FRN 0006-0659-32

Sercel Inc. acquired Syntron Inc in December of 1999. This transfer was not completed at that time due to an oversight on our part.

The ONLY license we have with the FCC is THIS experimental license.

The individual who signed the *original* application, Mr. Jorgen Skjott, is no longer an employee of Sercel. His position was terminated shortly after the merger of Syntron and Sercel.

Mr. Mark Farine is the Vice President of Sales and Marketing for Sercel. Prior to the merger of Sercel and Syntron, Mr. Farine was the Vice President of Sales and Marketing for Syntron, and the direct supervisor for Jorgen Skjott.

Remittance for this change is being sent in the form of a check via mail.

Michael Xie
