Application Narrative for Proposed Special Equipment Program

Proposed Program

T.D.Williamson, Inc., the world's most recognized name in pipeline equipment and services, delivers safe integrity solutions for onshore and offshore applications. TDW's experts provide hot tapping & plugging, pipeline cleaning, geometry & MFL inspection, pigging and non-tethered plugging pig technology services for any pressurized pipeline system, anywhere in the world. It is a requirement to maintain GPS signals indoors to enable technicians to test, operate and perform maintenance on these systems while indoors.

Objectives

We seek to accomplish the following objectives:

1. Illumination of our factory floor, maintenance and service bays with re-radiated GPS Signals
2. Further design, development and enhancement of existing GPS related features and the ability to perform new product testing
3. Ability to troubleshoot and repair all equipment and systems utilizing GPS signaling without having to relocate the equipment outdoors in view of the satellites
