Message:

I am having trouble understanding your question about using the requested bands exclusively for research purposes for export and sale outside the United States, and how this relates to Radio Services.

My understanding of question 5 is that it relates to radio equipment, rather than radio services, that will be exported. (Is this authorization to be used for the exclusive purpose of developing radio equipment for export to be employed by stations under the jurisdiction of a foreign government?).

I can find no mention of radio services in the administrative portion of Form 442.

Does answering No to question 5 significantly reduce the chances of being granted an experimental license?

We need the ability to transmit in the WiMAX band to develop, test and evaluate software capable of supporting and managing roaming between WiMAX and other wireless technologies.

Thank you for your efforts to help me better understand the application process.
