Frank Wright
Ch. Frequency Liaison Branch
Federal Communications Comm.
Washington, D.C.

Mr. Wright:

Thank you for taking the time to talk with me regarding the an appropriate frequency band for the enclosed station license application (Form 442).

As you suggested, I contacted the FAA Frequency Coordinator in Seattle, Wash. He is:

Mr. Harry Gardner
(206) 227-3238

Mr. Gardner tells me that a number of licenses have been granted for the band from 1559 Mhz to 1610 Mhz. These are mostly U.S. Military and are all experimental. The nearest one to Salt Lake City, Utah is Falcon, Colorado for a Radio Navigation Satellite.

Mr. Gardner could see no problem with our using this frequency band on an experimental basis.

I hope this will help in your coordination efforts. Thanks again for your help.

Sincerely,

Dirk Ostermiller, Ch. Eng.
