

Item # 7

This experimental license is necessary for the fulfillment of a U.S. Government contract. The contract is with the U.S. Army Medical Research and Materiel Command. Contract Number DAMD 17-98-2-8002

The University of Texas at Houston in partnership with the Naval Research Laboratory is developing a Disaster Relief and Emergency Medical Services (DREAMS) vehicle. This vehicle will be equipped with Ku-Band and eventually Ka-Band satellite communications, IP, and video equipment allowing it to send and receive high definition video and IP data. It is designed for rapid response to emergency management situations across the country. The satellite hub for the DREAMS project will be fixed at the University of Texas Institute of Biosciences and Technology.
