Special Conditions:

- (1) GPS re-radiators are limited to a maximum EIRP value that will result in power levels not to exceed a power spectral density of -140 dBm/24 MHz measured at a distance of 100 ft from the building where the test is being conducted. Any malfunction, misalignment, or tampering of the equipment or its location which results in an increased power spectral density outside the building could cause harmful radio frequency interference to GPS receivers, including those in aircraft and/or ground based facilities.
- (2) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (3) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.
- (4) Stop Buzzers:
 Roger Greene - Phone: 316-515-6713/ Cell: 316-644-3420
 David Cross - Phone: 316-517-6283/ Cell: 316-619-8073
 Danny Hankins - Phone: 620-332-0432/ Cell: 620-870-9388
- (5) Operation is limited to activity for the purpose of testing radionavigation satellite service (RNSS) equipment and systems.

Special Conditions:

- (6) Licensee shall post signs on doors to the test area notifying that, "GPS re-radiator is in use and the GPS information you receive may be in error."
- (7) The test equipment shall only be used indoors and shall be under the control of the Company.
- (8) GPS re-radiators must operate in accordance with Section 8.3.28 of the NTIA Manual.
