To: Jose Trevino

Date: February 18, 2009

Subject: FCC file number 0044-EX-PL-2009

Message:

Mr. Trevino,

In regards to your correspondence requesting a designated point-of-contact to terminate transmissions if interference occurs, I will be the designated point-of-contact and my cellular phone number is 301-377-4644. As an alternate, my colleague Ali Yaman's cellular phone number is 301-377-4907. We will both be the technical leads for operation and testing of our ALE equipment.

Regarding my request for a 5-year license authorization period, this license application is intended to support development and testing of HF ALE radios, ALE Modems, and ALE Controllers. Thales is a manufacturer of this equipment and requires these frequencies to support over-the-air testing of existing and newly developed equipment as well as over-the-air interoperability testing with US Government and US DoD customers. This work will continue into the foreseeable future (10+ years), well beyond the two year license period.

Very Respectfully,

Andy Schiltz
Principal Systems Engineer
