

Request for Expedited Processing

Exhibit A
The Blue Zone Utah
Draper, UT

The Blue Zone Utah (TBZ UT) requests expedited treatment by the Commission of this application for experimental authorization. Expedited action is necessary to ensure that TBZ UT's proposed experimental operations can be deployed without delay and the testing be completed prior to any decisions or changes are made regarding the use of unlicensed devices in the 3650 – 3700 MHz band.

TBZ UT has already placed orders for the purchase of the equipment listed in this application and is prepared to immediately execute leases on towers, buildings and rooftops. As a result, any lengthy delays in the approval process would prove detrimental to TBZ UT's proposed experimental operations.

Sincerely,
Ahmed El-Mahdawy
President
The Blue Zone Utah
