

REQUEST FOR SPACE SEGMENT TO BE USED WITH LAND-BASED SES TERMINALS

The Federal Communications Commission (FCC) requires COMSAT Mobile Communications to obtain authorization for providing space segment to be used in providing services via land-based ship earth station terminals. The FCC will authorize COMSAT to provide space segment for such services only under certain conditions. The FCC will approve temporary limited use of such stations only where no other means of communications are available such as in the case of emergency situations resulting from disasters or where these terminals are the only adequate means of meeting urgent communications requirements in remote locations. In order to enable us to obtain FCC authorization, the following information is required.

Applicant: The BOC Challenge 1994-95

Brief description of applicant's business: Manage the BOC Challenge which is a single handed around the world Race.

Ultimate user of terminal: Peter Dunning

Who will operate the terminal?: Peter Dunning

Where will the terminal be operated? Newport, RI
South Africa, Australia, Uruguay

Explain the services for which the terminal will be used and why no other means of communications are available:

Tracking of race participants, communicating with race participants, and used in a safety and distress situation to coordinate race vessels.

What is the required timeframe for use of the terminal for this service? 2 yrs.

Have you obtained authorization from the FCC (commercial applicants) or NTIA (USG applicants) for ground segment use of the terminal? Please provide authorization date or date the authorization request was submitted. yes

**(NOTE) - Customers are to be informed that they are responsible for filing with the FCC' Office of Engineering Technology an experimental license form (Form 442) which is the procedure the FCC follows for these TAs. This applies to all Land-Based terminals for domestic (U.S.) only.
