Special Conditions:

- (1) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.
- (2) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (3) Operation in the 1710-1755 MHz band is performed on the ground, in which case requires notification to Advanced Wireless Services licensees within 15 km around each test site is necessary.
- (4) Any operation in the 1850-1990 MHz and 2130-2200 MHz band must be coordinated with the existing and future users within 15 km around each test site to avoid interference.
- (5) The designated point-of-contact to terminate transmissions if interference occurs is Loren Ayotte at 425-647-5011.
- (6) Operation is NOT permitted on the frequency bands 1755-1785 MHz and 1805-1850 MHz due to potential interference to federal operations.
