(File Number)

NAME The Boeing Company

This Special Temporary Authorization is granted upon the express condition that it may be terminated by the Commission at any time without advance notice or hearing if in its discretion the need for such action arises. Nothing contained herein shall be construed as a finding by the Commission that the authority herein granted is or will be in the public interest beyond the express terms hereof.

This Special Temporary Authorization shall not vest in the grantee any right to operate the station nor any right in the use of the frequencies designated in the authorization beyond the term hereof, nor in any other manner than authorized herein. Neither the authorization nor the right granted hereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934. This authorization is subject to the right of use of control the Government of the United States conferred by Section 706 of the Communications Act of 1934.

Special Temporary Authority is hereby granted to operate the apparatus described below:

Purpose Of Operation:

The lab will radiate with this equipment for testing and calibration purposes.

Station Locations

2255.5 MHz	FX	415KF2D	4 W (ERP)	0.002 %

Special Conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (2) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.

This authorization effective October 10, 2017 and
will expire 3:00 A.M. EST April 10, 2018

**FEDERAL
COMMUNICATIONS
COMMISSION**

Special Conditions:

- (3) The Boeing Company needs to provide justification or explanation for the reason that Boeing are calibrating equipment to operate in a government only frequency band.

- (4) The Boeing Company needs to provide information to justify the need for the lengthy duration required for the calibration testing, when typical calibration testing can generally be accomplished in a much shorter timeframe.
