Subject: S100 operation at Florence

Jim,

The United States Special Operations Command endorses the urgent need to grant frequency approval to Boeing for S100 Camcopter ground and flight operations in the Arizona Army National Guard, Florence AZ restricted airspace at no cost to the Government. The approval of these frequencies are in direct support of USSOCOM SOF warfighter training and testing. The delays and costs incurred from finding alternate locations directly affect the SOF mission and employment of the S100 Camcopter.
