

**Background**

The Secure Border Initiative (SBI) was established on November 2, 2005 by the Department of Homeland Security (DHS) as a multi-year plan to secure America's borders and reduce illegal immigration. SBI will coordinate DHS efforts to ensure the legal entry and exit of people and goods moving across U.S. land borders and the enforcement of immigration, customs and agriculture laws at the borders, within the country and abroad.

**Requirement**

The Boeing Company is required to test the MSTAR radars being sold to the US Department of Homeland Security prior to delivery. This testing is to ensure each radar is operating within specifications.

This testing is in support of a US Government SBINet contract (contract # HSBP1006D01353). The testing is under the control of Boeing personnel.
