

Equipment: AL-101
Emission Designator: 110MF9N
ERP: .6 W
Frequency: 4300 MHz

Technical Description:

This application is for low altitude (0-2500 ft) radio altimeter (LRRRA). It transmits a Frequency Modulated signal to ground. The Airborne receiver determines altitude from returned signal. It gives accurate indications from surface to 2500ft. Sweeps up in 5 milliseconds then down in 5 milliseconds. License will be used to test this radio according to the description above.

Stop Buzzer: James L. Taylor
