Subject: Request for Info - File # 0652-EX-PL-2015

---

Message:

In the technical description it states that "Antenna Gain in DB: Max Gain: 28.8dBi at 14.500GHz and 31.1dBi at 11.7500 GHz" and that the antenna will be "directed North (away from the satellites) at 0° elevation, to allow us to test for non-interference to other aircraft antennas"

Are they looking for other information?
