Purpose of Operation:

The purpose of this STA license is to conduct communications data, voice, and EMI / EMC test of aircraft communications systems that are currently in for depot level maintenance and upgrades.

Technical Description:

This operation will utilize the Rockwell Collins VHF radio systems to communicate with a ground station within 100 yards of the aircraft. The testing will entail communications voice and data checks with the stationary aircraft.

Required Dates:

This Special Temporary License will be required for a 6 month period.
