Message:

The general program overview statement provided in this application is a statement that we worked out at the beginning of the program so the NTIA would be clear as to why federal spectrum was required to support a Direct Commercial Sale (DCS) program. This statement has been added to all the applications could need NTIA coordination to support this program.

The telemetry system on this application is in the U.S federal allocated telemetry spectrum. The radar system on this application is the same system that is currently undergoing U.S. Navy spectrum certification on the U.S. Navy variant of this aircraft.  
There are no India specific spectrum allocated systems on this application.

The only India specific spectrum allocated system on this aircraft is the Mobile Satcom System currently approved under STA WF9XSO.

Please let me know if you have any other questions.

Thanks
