

NARRATIVE STATEMENT

Pursuant to Section 5.3 and Section 5.61 of the FCC's rules, The Knoch Group, LLC. hereby respectfully requests a special temporary authority ("STA") from July 28th, 2026 to December 31st, 2026 to operate in the 24.45-24.65 GHz band to operate its radars.

A. Purpose of Operation and Need for Special Temporary Authority:

Echodyne has received equipment authorization from the FCC for the EchoGuard radar (FCC ID 2ANLB-MESASSR00053) and the EchoShield radar (FCC ID 2ANLB-MESA00054). However, The Knoch Group, LLC requests this STA to allow it to test the radar in specific scenarios in conjunction with customers. The STA is for testing purposes only and not for permanent installation of the radars. The testing under this STA is related to radiolocation applications.

B. Location of Proposed Operation:

The Knoch Group LLC proposes to test the radar at a fixed location within the area described below.

Location	Coordinates (NAD83)	Radius of Operation
Utah Valley University (Salt Lake Campus)	40°45'36"N - 111°50'56"W	20 km

C. Technical Specifications:

1. Frequencies Desired

The Knoch Group, LLC requests authorization to operate in the 24.45-24.65 GHz bands.

2. Effective Radiated Power

The EchoGuard units to be deployed operate at a peak maximum transmitter power output of 3.2W, and a peak maximum effective radiated power of 246W. Operations will be conducted to comply with rules relating to human exposure to radiation.

3. Modulation and Emissions

The EchoGuard radar operates using linear FM modulation. The primary emission designator is 45M0FXN. The emissions will not extend beyond the frequency bands requested.

4. Antenna Information

No antennas will be mounted in a fashion that would require approval under FAA or FCC rules and regulations.

5. Equipment To Be Used

The Knoch Group, LLC will conduct the testing with a maximum of 1 units.

D. Protection Against Causing Interference:

In the event that it receives a complaint of harmful interference from the proposed operation, The Knoch Group, LLC will take immediate action to address the interference. The company has designated Edward Knoch (contact information below) to act as the "stop buzzer" for this purpose.

E. Restrictions on Operation:

The Knoch Group, LLC recognizes that the operation of any equipment under experimental authority must not cause harmful interference to authorized facilities. Should interference occur, The Knoch Group, LLC will take immediate steps to resolve the interference, including discontinuing operations if necessary.

In addition, The Knoch Group, LLC will advise entities using the equipment that permission to operate has been granted under experimental authority issued to The Knoch Group, LLC, that such operation is strictly temporary, and that the equipment may not cause harmful interference.

F. Public Interest:

Grant of an authorization will permit The Knoch Group, LLC to demonstrate its innovative radar equipment and enhance public safety.

G. Contact Information:

For questions, or in the unlikely event interference concerns should arise during the period of authorization requested by this application, please contact the company's "Stop Buzzer" identified below:
