Message:

Hello Ben,

Thank you for modifying the lowest frequency to be 6575 KHz. There is one more item to fix. For the 6575 - 8250 kHz frequency band (for all the antennas), the emission designators currently read "250KXX" , they should read "1M00XX".

Can you make this change please? I'd be happy to as well if that is your guidance.

Thanks,
Maureen
