Representing the Interests of Two-Way Amateur Radio Communication

TJ3Sat

21 June 2013

Robert Huddleston KK4PHU

Dear Robert

The panel has discussed your coordination request and have coordinated the following frequency:

Downlink	437,320 MHz
Uplink	145,980 MHz

Please note that all frequencies in the amateur satellite service are shared frequencies. We have attempted to make the best possible selection for your project. You have not given a final launch date. Please keep us informed once you have the information as well as which other satellites operating on amateur frequencies may be on the same launch. Although we have taken note of other satellites on the same mission, it remains your responsibility to keep us informed of any possible frequency clashes.

You are also referred to the ITU requirements for satellites. We have prepared an easy reference document which is available on www.iaru.org/satellite, it will assist you to comply with the ITU requirements for Amateur satellites.

Please also read the attached "controlling satellites" document.

Best wishes for a successful project. Please keep us informed of developments and progress.
