

Mr. Huie

I wish to communicate with Amateur stations for long-range propagation studies. And to experiment with vertical and loop antenna's on VLF propagation during various weather conditions.

Also,

The ARRL has petitioned the FCC to authorize Amateur Radio allocations at 136 kHz and in the 160-190 kHz band. The petition was denied.

The FCC in there denial of the approval of an Amateur radio LF band, suggested that individuals apply for Part-5 licenses instead until they can look at the matter in the future.

Please feel free to contact me if you require more information.

Thank you

Lawrence Thomas
