

DESCRIPTION OF TRANSACTION

By this application, the parties respectfully request that the Commission consent to the transfer of control of Ticom Geomatics, Inc. ("Licensee"), an indirect wholly-owned subsidiary of Six3 Systems Holdings II, Inc. ("Transferor"), to CACI, INC.-FEDERAL ("Transferee"). Pursuant to an agreement dated October 8, 2013, Transferee intends to acquire all of the capital stock of Transferor. Licensee holds one Experimental wireless license, WF2XIV, which is the subject of the instant application, and one wireless license, WPPZ598 (IG), which is the subject of a separate application. Commission approval will serve the public interest by enabling Licensee to continue to make use of its licenses while providing innovative geomatics services to government and industry.

If you have any questions for the transferor or the licensee during the pendency of the application, please contact Daniel Kahn, Covington & Burling LLP, dkahn@cov.com, 202-662-5539.
