Public interest showing:

The Commission has heretofore found it to be in the public interest to explore the development of ultra-wideband technology. *See Notice of Inquiry* in ET Docket 98-153 released September 1, 1998. This demonstration will afford an opportunity for a major metropolitan police department to evaluate an ultra-wideband through-the-walls radar unit in an environment designed to train officers in tactical methods for use in situations involving protection of innocent persons and the apprehension of suspects.
