

Request to Expedite Application Processing

Friday, February 23, 2007

L3/Linkabit is currently under contract to provide a satellite mobile data communications system for use in the U.S. military Triton Program. Contact information for the military program manager can be provided if requested.

The first testing in Hawaii is to be conducted during the week of 19-23 March.

To meet critical governmental service dates, L3/Linkabit requests the grant of this modification to permit them to perform testing of the transportable earth station. The antenna is to be used by U.S. military forces to provide digital data services in support their operations.
