Message:

Per your statement:

Mr. Hurlock, Please verify the location (latitude/longitude). The given latitude (NL 38-53-24) and longitude (WL 77-00-59) is location at the Pentagon in Virginia.

I rechecked my lat/lon using NAD83 Datum and these coordinates are located between 3rd and 4th street and between Madison Dr and Jefferson Dr in East Seaton Park, Washington, DC. This is the correct location of the transmitter.

I checked the location of the Pentagon and it is showing the following Lat/Lon
WL 77-03-21.09 NL 38-52-14.12
