

System Diagram

Here is the detail information between two stations.

- 1) The frequency separation : 500 KHz (Center to Center), adjacent channel
- 2) Polarization Isolation : Horizontal at Franklin and Vertical at Runny Mede
- 3) 29.84 miles away from Carriage Hill to WNKO XMTR

Based on the facts above, there won't be any potential interference problems at all.
Please review and if you have any questions, please let me know.
