Message:

Can you please clarify what part of the emissions are missing or what you expect to see? The information I have for the radios is as follows:

For the DSRC Radios:

D7D -- stands for Amplitude & Phase Modulation / 2 or more sub channels / Data Transmission
Modulating Signal is OFDM

For the channel measurements:

G1N -- stands for Phase Modulation / 1 sub channel / No Information Transmitted
Modulating signal is Pseudo-random sequence.

The person that will respond is Shad Pate, telephone 719-584-7116, cell 719-565-8133
