

Exhibit 1

TrellisWare Technologies, Inc. is requesting an update to FCC experimental license WK2XFG to fulfil the requirements of a government contract with the United States Government. The current license supports 25 MHz bandwidths, but being able to conduct testing at narrower bandwidths would increase the value of the upcoming experimentation.

Agency: Office of Naval Research, US Navy

Contract #: N6833517C0223

Contract Title: Mobile Naval Troposcatter Communications

Government POC:

- 1.) Dr. Santanu Das; (703) 588-1036; santanu.das@navy.mil
- 2.) Sunoy Banerjee; (703) 696-7851; sunoy.banerjee.ctr@navy.mil

Narrative Statement: TrellisWare Technologies, Inc. is currently under a contract with the Office of Naval Research. The objective of this contract is for the development and prototyping of troposcatter communication links for the Navy. As part of the efforts under this contract, an initial demonstration is required to test the feasibility of 50 to 100 mile over-water troposcatter links using transmitter power levels and antenna dish sizes available on Navy vessels.
