

Narrative Statement Regarding Government Contract

Agency: US Army via National Spectrum Consortium

Contract No: NSC-19-9020

Government POC: Mr. Herald Beljour, (973) 445-9263, herald.beljour.civ@mail.mil

TrellisWare Technologies Inc. is currently under contract with the US Army, via the National Spectrum Consortium. The purpose of this contract is to design, implement, and test new waveform(s) for software-defined tactical radios which will allow the US Army to reduce its overall spectrum usage.

In order to test and validate these waveforms in realistic use cases, TrellisWare needs to conduct real-world testing at multiple frequencies in the 30-88 MHz band (excluding the FCC band from 74.8 MHz to 75.2 MHz).
