

FCC Form 442 --- Exhibit 1
Reference section 10

Trimble Navigation Ltd. is the only designer and manufacturer of Inmarsat Standard-C communication equipment in the U.S. Models appropriate for Maritime and Land Mobile use are manufactured and tested in Sunnyvale, CA. This request for license is to enable the testing and demonstration of the Land mobile product. Specifically, mobile and base units will be used for tracking and position reporting studies and for verifying the performance of the equipment in simulated and actual field use. All units to be used in these studies will have type approval by Inmarsat.
