

Exhibit – Explanation of Modification

TRN Atlanta, LLC (“TRN”) hereby requests a modification of operating power with respect to Call Sign WD2XOW, from 600 nW ERP to .089 mW ERP. The increase in power is necessary to provide an accurate testing environment associated with the pending TRN waiver (ET Docket No. 06-161). The increased power will be necessary for only one calendar week, the timing will be dictating by grant of the subject modification application and coordination with the MARTA system over which TRN operates. TRN will advise the Commission immediately prior to commencing testing at the increased power and upon cessation of testing.
