Message:

Hi,

Sorry for the delay in responding, the email ended up in my archive for some reason. The frequencies are simulating both the uplink and downlink, with the Earth to Space on the 2m band, and the Space to Earth on 400MHz. If it is not possible to do the uplink on that frequency, are there any nearby frequencies that would work? Previously, the plan was to use the 144MHz amateur band under an experimental license, but that is no longer allowed by the IARU.

Thank you,
Mack Goodstein
