RE: WN9XQS, Satellite transmission notification

Dear Mr. Knapp,

This letter serves as notification to meet Special Condition 4 of Experimental License WN9XQS that transmissions have ceased from our satellite (end date 24 February 2019). At approximately 5:00 AM UTC on 25 February 2019, the UbiquitiLink payload (designated *De La Paz*) along with the Cygnus NG-10 spacecraft re-entered and burned up in the Earth's atmosphere.

We are grateful for you and your team's time and effort to grant the license and our amendment.

Best Regards,

Margo Deckard  
COO
