Date: January 09, 2012

Subject: FCC File No. 0639-EX-PL-2011

Message:

I would like this to be the correct application please.

(b) Except as provided in ? 0.459(a)(3), each such request shall contain a statement of the reasons for withholding the materials from inspection (see ? 0.457) and of the facts upon which those records are based, including:

(1) Identification of the specific information for which confidential treatment is sought;
The information that is meant to be kept confidential does not pertain to the technology itself, but that the demonstration is being held for the purposes of identifying Integrated Fixed Tower (IFT) components for the proposal from the DHS under solicitation number HSBP1012R0024.

(2) Identification of the Commission proceeding in which the information was submitted or a description of the circumstances giving rise to the submission;
The purpose of the submission is to allow Ultra Electronics to test radar components for the IFT proposal from DHS. If this request to keep the purpose of the exercise is an issue for the approval of the request, then we will rescind our request for confidentiality.

(3) Explanation of the degree to which the information is commercial or financial, or contains a trade secret or is privileged;

The information that is being withheld is commercial intelligence in nature. We would like to keep our competitors from knowing about the experiment and or the purpose of the experiment. The radar, technology, and frequencies being used are either COTS or GOTS. There is no secret in the technology or information that is privileged.

(4) Explanation of the degree to which the information concerns a service that is subject to competition;

The performance of this experiment is the service that is subject to competition. We are attempting to keep our competition from knowing about its existence, location, or purpose.

(5) Explanation of how disclosure of the information could result in substantial competitive harm;

This would allow our competitors to learn of the team we have assembled and the particular components we have brought together for solving the Integrated Fixed Tower proposal.

(6) Identification of any measures taken by the submitting party to prevent unauthorized disclosure;

Ultra Electronics has refrained from publishing any broad announcements of the experiment. We are attempting to keep the event low key.

(7) Identification of whether the information is available to the public and the extent of any previous disclosure of the information to third parties;
The information related to the individual technologies is available via public access and the internet. The release of this information is not an issue for Ultra Electronics. We are attempting to keep the purpose of the event confidential.

(8) Justification of the period during which the submitting party asserts that material should not be

available for public disclosure; and

Once the award is released on the solicitation number HSBP1012R0024, then the information can be released. We believe that will come in the months of May or June, 2012.

(9) Any other information that the party seeking confidential treatment believes may be useful in assessing whether its request for confidentiality should be granted.

None.
