- Exhibit A

Universal Avionics Systems Corporation, FRN 0019471663, would like to conduct Flight Test of a VHF Data Radio (VDR).

VHF Data Radio frequencies are specifically assigned for data communications and are not shared with voice communication.

The Engineering Development will take place in Redmond, Washington and the flight test will be conducted, in the Continental US, originating from Tucson, Arizona.

Operating frequencies will be used as follows:

ACARS, 13K0A2D on 131.550 and 136.850 Mhz
VDL2, 14K0G1D on 136.975 Mhz
