All:

Below is the information that I received from John regarding your question about NTIA conditions. Please go ahead and grant the licenses as it does not appear that there any conditions, but if we happen to receive any conditions after the fact we will amend the licenses to include them.

Thanks,
Nnake

Not that I'm aware of, but they have access to OFACS, so they should check the parameters they sent (the name of the Cubesat, antenna data or any other data they may place on their grants but didn't place in the ELS applications. If you recall, I had to get information from ELS myself to complete some of the records).

Hi John,

I just called your office phone but you were not there. My staff is inquiring whether there are any conditions from the NTIA associated with the approved records.

Please let me know.

Thanks,
Nnake

The records have been accepted at NTIA. The OFACS system will be updated today or early next week. ELB should be able to grant these today though, but your engineers should review the records in OFACS to make sure that their grants match the information in the records, especially

the two that Behnam and I had to correct.

John K.

John

NTIA approved the following records:

NG 158152
NG 159088
NG 159348
NG 159349
NG 160446
NG 160447
NG 160448
NG 160544 thru NG 160547

NTIA has approved all the ones on the list you sent me.

We need you to submit reject votes for NG 160542 and NG 160543 which you indicated where dismissed but we still have in our system.
