

Explanation for the amendment to FCC memo for form 442

Form 442 File Number: 0419-EX-CN-2020

Confirmation Number: EL655696

To Whom It May Concern:

In our previous version of FCC memo, we mistakenly putting the request for a 47 CFR Part 97 – AMATEUR RADIO SERVICE license for our uplink at 437.325MHz. We did get permission from IARU to operate at the amateur band, it was our misunderstanding to assume a Part97 license as we are using that band. But our operation is not an amateur radio service, thus we shall not request an AMATEUR RADIO SERVICE license. The amendment is to reflect the better understanding the nature of Part 97 license and our scientific operation.

Sincerely,

Wengang Zheng
