HiakaSat

Jeremy Chan

20 May 2013

Jeremy

Thank you for the revised coordination request. You have opted to licence your project as an experimental satellite. The coordinated frequency is:

Uplink/downlink	437,270 MHz
Uplink/Downlink	145,980 MHz
Telemetry:	2415.000 MHz

The above frequencies have been coordinated with the understanding that you have agreed to the IARU terms of reference for the use of amateur service spectrum for experimental purpose.

You have not indicated on which mission your satellite is manifested. As soon as this information is available please inform us. Also please let us know which other satellite(s) operating on amateur frequencies will be at the same launch.

Please also confirm the name and full contact details of the person who will control the operation of KYSAT -2 after launch.

Please note that all frequencies in the amateur satellite service are shared frequencies. We have attempted to make the best possible selection for your project.

We have noted the measures taken in controlling the satellite. We however draw your attention to the attached paper "controlling satellites" which sets out the requirements as per ITU regulations.

Best wishes for a successful project. Please keep us informed of progress
