

Cubesail Cubesat: Reason for License Extension Application

The period of the existing license ends April 1, 2019. An extension of 2 years, to April 1, 2021, is requested. The period for which Cubesail was originally licensed, began April 5, 2018. The launch date slipped and it was actually launched December 13, 2018.

We request an extension to allow completion of the experiment. All technical parameters are unchanged from the existing license 0252-EX-CM-2018; the only change requested is an extension of the period of operation.
