RE: LAICE Satellite – Orbit and Re-entry

Dear Professor Swenson,

This is to advise that our insurance broker, Marsh, provided an indication of the coverage limits and costs available from a commercial insurer. The policy will protect against third party liability for the exposures of the satellite in-orbit and as it re-enters the Earth's atmosphere.

Estimated annual premium for \$5,000,000 limit is \$8,800 and \$14,500 for \$10,000,000 limit. A firm quote is provided after review of a completed application.

Please let me know if you have any questions about the insurance.

Thank you.

Sincerely,

Tina McEllin,
Associate Director
