Subject: FCC-File.No: 0556-EX-CN-2021

Message:

The provided spacecap does not validate. Please ensure you are using the latest spacecap and GIMS software and reprocess the databases.

In the spacecap, please select a class of station other than amateur-satellite service for both the uplink and downlink.

The minimum power densities for both the uplink and the downlink appear much lower than expected. A quick check shows an expected value closer to -41.5 for the given emissions designators instead of -83. Please confirm the value of the minimum power densities.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of January 25, 2022 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
