Here is information for an FCC license

- Frequencies/Powers: We would like to be able to transmit on these same frequencies our fixed location.
- New Mobile Locations: In particular, we are considering "scenic view" locations where we have an unobstructed view of the water surface, preferably from an elevated position. We have not scouted the area, but have searched via Google and identified potential locations in the Benton Harbor area as well as some areas around Manistee County (close to Traverse City). These are the two locations we added in this submission.
- Time Period: Through the end of the calendar year (2017)
