UNIVERSITY OF NOTRE DAME
156 FITZPATRICK HALL
NOTRE DAME, IN 46556-5637

Re: UNIVERSITY OF NOTRE DAME

Your application is in a dismissal status effective 11/16/2020 without prejudice in accordance with Section 1.934 of the Commission's Rules for the reason(s) indicated below. If you still wish to be licensed, you must file a new application, fee, FCC Form 159 for feeable applications, and all required showings. If you currently hold a valid license, you may continue to operate under the parameters of that authorization.

If you are currently operating under authority provided by the Commission's Rules based on your submission of the above referenced application, you must immediately cease operation until such time as you come into compliance with the Rules.

Certain services are subject to mandatory electronic filing pursuant to Section 1.913. For all other services, you may file your application either electronically or manually, but not both. Electronic filing is recommended for the few radio services where manual filing is permitted. For information on how to file an application electronically, visit the website at <http://wireless.fcc.gov/uls>. If you wish to file your application manually, application forms can be obtained from the FCC's website at <http://www.fcc.gov/formpage.html>, by calling the FCC's Forms Distribution Center 800-418-FORM (800-418-3676), or from FCC's Fax Information System by dialing (202) 418-0177. For additional assistance, you may visit the website at <http://esupport.fcc.gov>. You may also call the FCC at (877) 480-3201 (TTY 717-338-2824). To provide quality service and ensure security, all telephone calls are recorded.

The service rules for the 70/80/90 GHz band state that licensees may use the 70 GHz, 80 GHz and 90 GHz bands for any point-to-point, non-broadcast service. The segments may be unpaired or paired, but pairing will be permitted only in a standardized manner(e.g., 71-72.25 GHz may be paired only with 81-82.25 GHz, and so on). (see 101.1507 ¶ Permissible operations). Based on the brochure attached to your application, the service you propose is not a point to point, non-broadcast service, but rather appears to be a radiolocation service. Consequently, your proposed operations are not consistent with the type of service permissible in the 70/80/90 GHz band (MM Radio Service). In light of the above your application is dismissed.

It may be permissible for you to obtain an experimental license through the Office of Engineering and Technology (OET). Please refer to <https://apps.fcc.gov/oetcf/els/index.cfm>.
